Welcome

With the passage of LB 439 last Legislative Session, the Department of Administrative Services Building Division's Security operation was transferred to the State Patrol.

The Patrol and DAS worked closely to transfer the security personnel, personnel records, payroll accounting and budget items by July 2004.

The Patrol placed the security staff in the Executive Protection/Capitol Detail Division. The new name

for the Division is now Executive Protection Detail and State Capitol Security Division.

The security of the Capitol Complex Area is a priority of the State Patrol. We will work with the Office of Capitol Commission, Department of Administrative Services and other State agencies to provide a safe environment for the public, state employees, appointed and elected officials.

New shoulder patch and badge

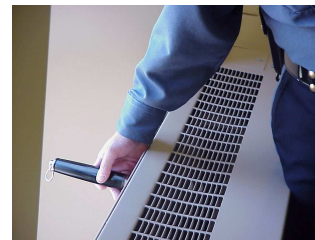

We will use a newsletter format to bring security issues to the Capitol, NSOB, IMS and other buildings that the Patrol is responsible for.

Making The Rounds

The Patrol is committed to bring the best possible service to the Capitol Complex Area. We have broadened the use of the DigiTool recording device. This device is computerized to record the date, time, location of a security officer's presence.

We have completed the Capitol and State Office Building with additional "buttons".

Each floor has at least a

The "button" and the wand

single button.

The greatest deterrent we can provide you is officer presence. The more that you see us will result in less issues dealing with disgruntled individuals.

So when you see a security officer coming in your area and making the rounds, introduce yourself and have him show you where the button in your area is located.
